DETAILED ACTION

Response to Amendment

Claim 21 has been amended.

Claims 3, 6, 7, 9-12, 19, 20 and 23 have been canceled.

Claims 24, 25, 29, 30, 41 and 42, drawn to non-elected inventions are withdrawn from examination.

Claims 21, 22, 27, 28 and 43-45 are examined on the merits.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Maintained Rejections

Claim Rejections - 35 USC § 112

3. The rejection of claims 21, 27, 28 and 43-45 under 35 U.S.C. 112, first paragraph, because the specification, does not reasonably provide enablement commensurate with the scope of the claimed invention is maintained. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Applicants argue that they discussed at length in Paper 10 received March 22, 2001 that there are a number of uses of the polypeptides of the present invention, which

ţ'.

Application/Control Number: 09/471,749

Art Unit: 1642

include toxicological screening, disease diagnosis and drug discovery. Moreover, Applicants assert that there is no requirement under the law to provide working examples of what is claimed and that the instant specification provides a requisite description of how to make and use what is claimed. This is found unpersuasive.

The Examiner has reviewed the entire specification and it is silent in regards to implementing molecules, SEQ ID NO: 3 and 5 in toxicological screening and drug discovery. The specification only contemplates the use of the said polypeptide sequences in disease diagnosis. And in that regard a legion of diseases are listed in the specification (page 32, lines 10-24) which according to the disclosure are capable of being remedied upon the administration of SEQ ID NO: 3 or 5. There is no corollary evidence presented that would substantiate treatment of inflammatory bowel disease or hepatoma with the same agents or that these disorders of differing pathology could be definitively diagnosed using the said molecules. Granted the Office does not require that experiments under the scope of the claims produce positive and astonishing results, however the experiments must be within the scope of the Forman factors (see Ex parte Forman, 230 USPQ 546, BPAI, 1986). Applicants have not provided any objective evidence (neither in vitro or in vivo) or data that supports the use of SEQ ID NO: 3 and 5, also known HAPOP for toxicological screening, disease diagnosis or drug discovery. There are no assays of record demonstrating the treatment of subjects with any of the disorders listed on page 32.

Therefore, in weighing the factors to be considered in determining whether or not the practice of a claimed invention would require "undue" experimentation, as set forth

Application/Control Number: 09/471,749

Art Unit: 1642

in *In re Wands* (8 USPQ 2d at 1404), the weight of the analysis clearly favors a finding of "undue" experimentation.

4. The rejection of claims 21, 22, 27, 28 and 43-45 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is maintained.

Applicants aver the specification provides an adequate written description of the claimed "variants" of SEQ ID NO: 3 and 5. Additionally, Applicants assert that the present claims define the claimed genus through the recitation of chemical structure and do not define a genus, which is "highly variant". Applicants also argue that the state of the art at the time the claimed invention was made provides support that the inventors were in possession of the claimed variants at the time of the filing of the instant application. This is found unpersuasive.

The Examiner concurs with Applicants in the fact that naturally occurring molecules exists. The basis of this instant rejection is that Applicants were not in possession of the claimed variants. Applicants have not set forth evidence that supports their possession of all the variants that are claimed. Applicants have not identified the critical amino acids of SEQ ID NO: 3 or SEQ ID NO: 5 that can or cannot be altered or mutated and give rise to a polypeptide that is capable of functioning as a human apoptosis associated proteins. Applicants have not defined the boundaries of

Application/Control Number: 09/471,749

Art Unit: 1642

the genus. No correlation has been set forth between the structure of these variant proteins and the alleged function. For these reasons, as well as the rejections set before in Papers numbers 8, 9, 12 and 13 the rejection is maintained.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alana M. Harris, Ph.D. whose telephone number is (703) 306-5880. The examiner can normally be reached on 6:30 am to 4:00 pm, with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, Ph.D. can be reached on (703) 308-3995. The fax phone

Application/Control Number: 09/471,749 Page 6

Art Unit: 1642

numbers for the organization where this application or proceeding is assigned are (703) 308-4315 for regular communications and (703) 308-4315 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
